

CAR of NASCAR NEXTEL CUP SERIES **TOMORROW**

DRIVER SAFETY

LARGER COCKPIT

- Enlarged compartment for driver – the roof is 2-1/2 inches higher and the greenhouse is four inches wider
- Driver is located closer to the center of the car

DOUBLE FRAME RAIL with STEEL PLATING

- Double frame rail on the driver's side with steel plating covering door bars to help prevent intrusion during impact and provide support for energy absorbing material

ENERGY MANAGEMENT MATERIALS

- Energy absorbing materials will be installed between the roll cage door bars and door panels to attenuate energy upon impact

SAFER FUEL CELL

- Fuel cell holds approximately 18 gallons and features a strengthened bladder, thicker container and safer check valve
- Energy absorbing honeycomb material surrounding fuel cell
